

High Performance . . .  
Under Pressure®

BIRNS Millennium  
Interconnect Catalog

Come see our team and the newest technology at Oceanology International in San Diego!

Come meet the BIRNS team at stand B54 next week to see the latest advancements in 6km-rated connectivity solutions. We'll have innovations ranging from cable assemblies with data speeds of 9.4+/- 0.1 Gigabits per second and optical assemblies qualified at 625 bar at 2° C ( $\pm 1^\circ$  C), to RF solutions with formerly unheard of performance capabilities: open face pressure ratings, and insertion losses of 0.7dB and VSWR of 1.7:1 at 3GHz.

Our team can walk you through our wide range of solutions to support your subsea system design, and demo our new ecommerce capability website offering [BIRNS Millennium™ connector kits online](#). We've made significant site design investments, making the experience educational and intuitive, and providing tools that give a clear, swift path to selecting what is needed for a specific requirement.

In addition to connector kits, accessories, our ABS Product Design Assessment (PDA) certified [NPT penetrators](#) are also available on the ecommerce site.

We're excited to connect with you in San Diego!
